

# WANTED – NOT!

Check out this bug's mug shot. You may not always see the mobster mosquitoes or terrorizing ticks out there but they can see you. And they can't wait to attack.

Now's the time to fight the bite. So don't go outside without tick and mosquito repellent. Check the label and ensure your spray, cream, or bracelet contains DEET.

And after you're back indoors look over yourself closely to make sure you're bug free.

Don't forget to fight the bite this summer and you'll always have a great time in the great outdoors.
