Elsie and Sally, thank you for your interest and kind words. If you are interested, a next step would be to identify those individuals who would like to learn how to identify marsh impairments and work toward making our marshes more resilient. This group could then connect with the Coastal Program and other agencies with an interest (e.g., USFWS has holdings in Awcomin Marsh) to form a local or state-wide SMARTeams Local Field Team. A state-wide team might be easier to form and stronger to accomplish more (I am thinking Jay Diener, Rayann Dionne, etc.). Best, David

David Burdick
