

## North Hampton-Rye 42312 (NH Route 1A)

### Project Purpose:

This study will evaluate alternatives for improvements to the revetment wall along NH Route 1A that aim to protect the highway infrastructure, preserve the coastline and prevent costly repairs to the revetment following storm events. This alternative study and following construction effort will be a collaborative effort involving the local Communities, State and Federal environmental groups and Federal Emergency Management Agency (FEMA).

### Status:

The NHDOT is currently collecting topographical information and assessing the existing condition of the revetments. This effort will be followed by the development of a range of alternatives for improvements to meet the purpose of the project. As alternatives are developed, the NHDOT will hold public meetings (Spring/Summer 2020) seeking input. The extent of improvements within the construction phase will be influenced by the amount of funding provided by FEMA.

### Input and Questions:

In addition to attending the Public input sessions, you can visit the project website: [www.nh.gov/dot/projects/northhamptonrye42312/index.htm](http://www.nh.gov/dot/projects/northhamptonrye42312/index.htm) or contact the Project Manager: Tobey Reynolds at [Tobey.Reynolds@dot.nh.gov](mailto:Tobey.Reynolds@dot.nh.gov) or by phone at : (603) 271-7421
