

From 2018 E-mail from:

**Nathalie M. Morison, CFM** Coastal Resilience Specialist

*I calculated the % total town assessed value at risk for each SLR scenario using the updated affected assessed value numbers used in the Coastal Risk and Hazards Commission report (2016 dollars). These originated from the Tides to Storms and C-RiSe projects.*

[Click Here](#) Tide to Storms information with the below scenarios.

You may also find the [2020 NH Coastal Flood Risk Guidance](#) useful. It provides updated detail about what sea-level rise scenarios NH coastal communities should be planning for.

Data are all from 2016 properties and values			
Rye Sea Level Rise Scenarios SS is Storm Surge	Count of Affected Parcels	Total Value of Affected Parcels	% of Total Town Value
<b>S1: 1.7' SLR</b>	414	\$341,751,000	18.12%
<b>S2: 4.0' SLR</b>	620	\$537,524,800	28.50%
<b>S3: 6.3' SLR</b>	780	\$667,904,700	35.41%
<b>S1F: 1.7' SLR + SS</b>	770	\$672,270,700	35.64%
<b>S2F: 4.0' SLR + SS</b>	934	\$784,898,700	41.62%
<b>S3F: 6.3' SLR + SS</b>	1,048	\$857,138,800	45.45%
