

Does your Rye home have solar panels?

The Rye Energy Committee is working on a new initiative to help residents learn more about rooftop solar and compare their options.

More than 150 Rye homes already have solar. We'd like to hear from homeowners who would be willing to share their experiences with neighbors who are considering solar for their own homes.

If you'd be willing to answer questions, participate in a future workshop, or possibly be part of a solar home tour, please email the Rye Energy Committee at ryenhec@gmail.com.

Thank you for helping fellow Rye residents learn from local experience.
